In order to ensure the accuracy of our H21-911\_V1.0 pdf vce, our colleagues check the updating of H21-911\_V1.0 test answers every day.

**NEW QUESTION: 1**Which of the following is a large hardware/software backup system that uses the RAID technology?**A.** Tape Array.**B.** Crimson Array**C.** Table Array.**D.** Scale Array.**Answer: A**  
**Explanation:**A Tape Array is a large hardware/software backup system based on theRAID technology. There is a misconception that RAID can only be used with Disks.All large storage vendor from HP, to EMC, to Compaq have Tape Array based on RAIDtechnology they offer.This is a VERY common type of storage at an affordable price as well.So RAID is not exclusively for DISKS. Often time this is referred to as Tape Libraries orsimply RAIT.RAIT (redundant array of independent tapes) is similar to RAID, but uses tape drivesinstead of disk drives. Tape storage is the lowest-cost option for very large amounts ofdata, but is very slow compared to disk storage. As in RAID 1 striping, in RAIT, data arestriped in parallel to multiple tape drives, with or without a redundant parity drive. Thisprovides the high capacity at low cost typical of tape storage, with higher-than-usual tapedata transfer rates and optional data integrity.References: KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the Ten Domains of Computer Security, 2001, John Wiley & Sons, Page 70. and Harris, Shon (2012-10-18). CISSP All-in-One Exam Guide, 6th Edition (p. 1271). McGraw-Hill. Kindle Edition.
