NEW QUESTION: 1 A large, multinational company currently has two separate databases One is used for ERP while the second is used for CRM To consolidate services and infrastructure, it is proposed to combine the databases The company's compliance manager is asked to review the proposal and is concerned about this integration Which of the following would pose the MOST concern to the compliance manager?
A. There are specific regulatory requirements the company might be violating by combining these two types of services into one shared platform.
B. The attack surface of the combined database is lower than the previous separate systems, so there likely are wasted resources on additional security controls that will not be needed
C. Auditing the combined database structure will require more short-term resources, as the new system will need to be learned by the auditing team to ensure all security controls are in
D. By consolidating services in this manner, there is an increased risk posed to the organization due to the number of resources required to manage the larger data pool.
Answer: A

NEW QUESTION: 3 An organization has added 3 of his AWS accounts to consolidated billing. One of the AWS accounts has purchased a Reserved Instance (RI. of a small instance size in the US-East-1a zone. All other AWS accounts are running instances of a small size in the same zone. What will happen in this case for the RI pricing?
A. Only the account that has purchased the RI will get the advantage of RI pricing
B. Any single instance from all the three accounts can get the benefit of AWS RI pricing if they are running in the same zone and are of the same size
C. One instance of a small size and running in the US-East-1a zone of each AWS account will get the benefit of RI pricing
D. If there are more than one instances of a small size running across

multiple accounts in the same zone no one will get the benefit of RI
Answer: B
Explanation: AWS consolidated billing enables the organization to consolidate payments for multiple Amazon Web Services (AWS) accounts within a single organization by making a single paying account. For billing purposes, consolidated billing treats all the accounts on the consolidated bill as one account. This means that all accounts on a consolidated bill can receive the hourly cost benefit of the Amazon EC2 Reserved Instances purchased by any other account. In this case only one Reserved Instance has been purchased by one account. Thus, only a single instance from any of the accounts will get the advantage of RI. AWS will implement the blended rate for each instance if more than one instance is running concurrently.
