NEW QUESTION: 2 **A. Option D** **B. Option B** **C. Option A** **D. Option C** **Answer: A** Explanation: When implementing a custom membership provider, you are required to inherit the MembershipProvider abstract class. There are two primary reasons for creating a custom membership provider. You need to store membership information in a data source that is not supported by the membership providers included with the .NET Framework, such as a FoxPro database, an Oracle database, or other data source. You need to manage membership information using a database schema that is different from the database schema used by the providers that ship with the .NET Framework. A common example of this would be membership data that already exists in a SQL Server database for a company or Web site. Reference: MembershipProvider Class
