With the help of Estruturit exam learning material, you will learn the ways to prepare for the NSE 5 Network Security Analyst NSE5\_FMG-7.2 exam.

**NEW QUESTION: 1** Which XML element correctly defines a 32-bit integer field?  
**A.** `<attribute name="count" label="Count" type="long" />`  
**B.** `<attribute name="count" label="Count" type="long" length="32" />`  
**C.** `<attribute name="count" label="Count" type="integer" length="32" />`  
**D.** `<attribute name="count" label="Count" type="integer" />`  
**Answer: B**

**NEW QUESTION: 2** Which three statements about GLBP are true? (Choose three.)  
**A.** It elects a single active virtual gateway to appoint and manage multiple active virtual forwarders.  
**B.** It elects multiple active virtual gateways to appoint and manage a single active virtual forwarder.  
**C.** It allows the configured virtual IP address to be used on a physical interface as well.  
**D.** Preemption is enabled for the configured active virtual gateway by default.  
**E.** It uses a virtual MAC address that starts with 0007.b4.  
**F.** It uses a virtual MAC address that starts with 0070.4b.  
**Answer: A, C, E**  
**Explanation:** The virtual MAC address in GLBP is 0007.b400.xxyy where xx is the GLBP group number and yy is the different number of each gateway (01, 02, 03...). One of the routers in a GLBP group is elected as an AVG - Active Virtual Gateway. There is only one active AVG in a group, and it is the one that responds to ARP requests sent to the virtual gateway IP address by replying with different virtual MAC addresses in response packets. GLBP allows the configured virtual IP address to be used on a physical interface. By default, the GLBP gateway preemptive scheme is disabled. A backup virtual gateway can become the AVG only if the current AVG fails, regardless of the priority assigned to the virtual gateway.

**NEW QUESTION: 3** The case number in an evidence file can be changed without causing the verification feature to report an error, if  
**A.** The evidence file is reacquired.  
**B.** The user utilizes the case information editor within Encase.  
**C.** The case information cannot be changed in an evidence file, without causing the verification feature to report an error.  
**D.** The user utilizes a text editor.  
**Answer: C**
