Answer: A
Explanation: Although it is not recommended, you can use this procedure to disable security identifier (SID) filter quarantining for an external trust with the Netdom.exe tool. You should consider disabling SID filter quarantining only in the following situations:
* Users have been migrated to the trusted domain with their SID histories preserved, and you want to grant those users access to resources in the trusting domain (the former domain of the migrated users) based on the SIDHistory attribute. Etc.
