Different versions have their own advantages SPLK-1005 Question Explanations and user population, and we would like to introduce features of PDF version for you.

**NEW QUESTION: 1**An organization headquartered in Hamburg, Germany has a remote office in the USA . The remote office has 1000 users whose mailboxes are hosted on an Exchange server in Hamburg, Germany. The connection between the two offices is slow. The organization has an archiving policy that uses Symantec Enterprise Vault 10 .0 for Exchange (EV) to archive emails that are more than one month old. Remote users in the USA frequently access archived emails. Which option provides remote users seamless access to EV archived email while reducing network traffic?**A.** synchronize users' mailboxes more than once a day**B.** enable Vault Cache for remote users**C.** enable Outlook Anywhere**D.** create PST files before emails are archived**Answer: B**

**NEW QUESTION: 2**Select the one correct statement relative to Barings Bank.**A.** Proprietary and agency trading were combined and therefore did not increase risk.**B.** Proprietary and agency trading were separate and therefore did not increase risk.**C.** Proprietary and agency trading were separate and did increase risk.**D.** Proprietary and agency trading were combined and therefore did increase risk.**Answer: D**

**NEW QUESTION: 3**You have implemented a Sourcefire IPS and configured it to block certain addresses utilizing Security Intelligence IP Address Reputation. A user calls and is not able to access a certain IP address. What action can you take to allow the user access to the IP address?**A.** Create a rule to bypass inspection to allow the traffic.**B.** Create a network based access control rule to allow the traffic.**C.** Create a custom blacklist to allow the traffic.**D.** Create a whitelist and add the appropriate IP address to allow the traffic.**E.** Create a user based access control rule to allow the traffic.**Answer: D****Explanation:**ExplanationUsing Security Intelligence WhitelistsIn addition to a blacklist, each access control policy has an associated whitelist, which you can also populate with Security Intelligence objects. A policy's whitelist overrides its blacklist. That is, the system evaluates traffic with a whitelisted source or destination IP address using access control rules, even if the IP address is also blacklisted. In general, use the whitelist if a blacklist is still useful, but is too broad in scope and incorrectly blocks traffic that you want to inspect.**Source:**
