**NEW QUESTION: 2** CORRECT TEXT Customer Requirements: You have been tasked with creating a vSphere 6.5 data center design for an organization. The organization is looking to virtualize their physical email application. The company has provided a list of requirements that must be included in the design:  
- E-mail database is replicated between two servers at a logical level, with no shared disk configurations.  
- E-mail databases meet corporate criteria for LUN provisioning, and must reside directly on storage array.  
- Operating system disks do not meet corporate requirements for LUN provisioning, and per policy should not share the same VMFS storage location for redundancy reasons.  
- Internal users currently point to three Client Access Servers for load balancing.  
- External users currently point to three Web Client Access Servers for load balancing.  
- Customer requires discrete hardware to provide security between internal servers and externally available servers, as well as between externally available servers, and client connections from offsite.  
Design Requirements: Create a solution that shows the service dependencies required for virtualizing the email application, including:  
- All required storage for Mail DB VM(s) only  
- All required network and security connection(s)  
- All required virtual

machine(s)- All required user(s) Place all items in required container(s). Connect VMFS datastore(s) to required virtual machine(s). Place disk(s) over the required storage type(s).
