First, the wizard creates the HybridConfiguration object in your on-premises Active Directory. This Active Directory object stores the hybrid configuration information for the hybrid deployment and is updated by the Hybrid Configuration wizard. Next, the wizard gathers existing on-premises Exchange and Active Directory topology configuration data, Office 365 tenant and Exchange Online

configuration data, defines several organization parameters and then runs an extensive sequence of configuration tasks in both the on-premises and ExchangeOnline organizations. E: Note: * By default, Microsoft Exchange Server 2013 doesn't allow you to send mail outside of your domain. To send mail outside your domain, you need to create a Send connector. * Use the Set-SendConnector cmdlet to modify a Send connector. / Parameters include TlsCertificateName The TlsCertificateName parameter specifies the X.509 certificate to use with TLS sessions and secure mail. Valid input for this parameter is [I]Issuer[S]Subject. The Issuer value is found in the certificate's Issuer field, and the Subject value is found in the certificate's Subject field. You issue this command: SQL > FLASHBACK DATABASE TO TIMESTAMP (SYSDATE - 5/24); Which two statements are true about this flashback scenario? **A.** The database must have multiplexed redo logs for the flashback to succeed. **B.** The database must be opened in read-only mode to check if the database has been flashed back to the correct SCN. **C.** The database must be opened with the RESETLOGS option after the flashback is complete. **D.** The database must be MOUNTED for the flashback to succeed. **E.** The database must use block change tracking for the flashback to succeed. **F.** The database must be opened in restricted mode for the flashback to succeed.

Answer: D, F Explanation: **B:** The target database must be mounted with a current control file, that is, the control file cannot be a backup or have been re-created. **D:** You must OPEN RESETLOGS after running FLASHBACK DATABASE. If datafiles are not flashed back because they are offline, then the RESETLOGS may fail with an error.
