NEW QUESTION: 2 You need to implement early stopping criteria as suited in the model training requirements. Which three code segments should you use to develop the solution? To answer, move the appropriate code segments from the list of code segments to the answer area and arrange them in the correct order. **NOTE:** More than one order of answer choices is correct. You will receive credit for any of the correct orders you select. **Answer:** Explanation: Explanation You need to implement an early stopping criterion on models that provides savings without terminating promising jobs. Truncation selection cancels a given percentage of lowest performing runs at each evaluation interval. Runs are compared based on their performance on the primary metric and the lowest X% are terminated. Example: from azureml.train.hyperdrive import TruncationSelectionPolicy yearly_termination_policy = TruncationSelectionPolicy(evaluation_interval=1, truncation_percentage=20, delay_evaluation=5)
