**NEW QUESTION: 1**Which security model uses division of operations into different parts and requires different users to perform each part?**A.** Non-interference model**B.** Biba model**C.** Bell-LaPadula model**D.** Clark-Wilson model**Answer: D****Explanation:**Explanation/Reference: Explanation:The Clark-Wilson security model uses division of operations into different parts and requires different users to perform each part. This is known as Separation of Duties.The Clark-Wilson model outlines how to incorporate separation of duties into the architecture of an application. If a customer needs to withdraw over \$10,000, the application may require a supervisor to log in and authenticate this transaction. This is a countermeasure against potential fraudulent activities. The model provides the rules that the developers must follow to properly implement and enforce separation of duties through software procedures.Incorrect

Answers:A: The Bell-LaPadula model does not use division of operations into different parts and require different users to perform each part.B: The Biba model does not use division of operations into different parts and require different users to perform each part.D: The Non-interference model does not use division of operations into different parts and require different users to perform each part.References:Harris, Shon, All In One CISSP Exam Guide, 6th Edition, McGraw-Hill, New York, 2013, p. 376

**NEW QUESTION: 2**Which information is available in HP Location Discovery Services?**A.** Location of a specific disk partition on a storage array**B.** Identification of the host server for a specific virtual machine**C.** Identification of a failed Field Replaceable Unit (FRU)**D.** Location of a server within a rack**Answer: D**
