**NEW QUESTION: 1**In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company has an on-premises Active Directory Domain Services (AD DS) domain and an established Azure Active Directory (Azure AD) environment. Your company would like users to be automatically signed in when they are on their corporate desktops that are connected to the corporate network. You need to enable single sign-on (SSO) for company users. Solution: Install and configure an on-premises Active Directory Federation Services (AD FS) server with a trust established between the AD FS server and Azure AD. Does the solution meet the goal? **A. Yes**. **B. No** **Answer: B** Explanation: Explanation/Reference: Explanation: Single sign on (SSO) can be enabled via Azure AD Connect.

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/connect/active-directory-aadconnect-ssso>

**NEW QUESTION: 2**An organization plans a SAM self-audit to reconcile their Microsoft Open license purchases against current deployment numbers. You need to complete the following tasks: \* Perform an inventory of deployed software. \* Identify previously purchased licenses. The solution must meet the following requirements: \* Include inventory for Windows desktops and servers. \* Minimize effort and cost. Which tool should you use to complete each action? To answer, drag the appropriate tools to the correct actions. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view

content.NOTE: Each correct selection is worth one point.**Answer:** Explanation:ExplanationBox 1: Microsoft Volume Licensing Servicing Center (VLSC)The Volume Licensing Service Center (VLSC) gives you easy access to:\* Volume Licensing benefits\* Download products and keys\* Access all your licensing information in one location\* View your relationship summary and license summary details\* Review the status of your enrollments\* Activate and consume Software Assurance benefitsBox 2: MAPThe MAP Toolkit is a FREE, agentless tool designed to simplify and streamline the IT infrastructure planning process across multiple scenarios through network-wide automated discovery and assessments.The MAP Toolkit inventories computer hardware, software, and operating systems in small or large IT environments without needing to install software on the target computers.

**NEW QUESTION: 3**You have an application running on an Amazon Elastic Compute Cloud instance, that uploads 5 GB video objects to Amazon Simple Storage Service (S3). Video uploads are taking longer than expected, resulting in poor application performance. Which method will help improve performance of your application?**A.** Use Amazon Elastic Block Store Provisioned IOPs and use an Amazon EBS-optimized instance**B.** Enable enhanced networking**C.** Leveraging Amazon CloudFront, use the HTTP POST method to reduce latency.**D.** Use Amazon S3 multipart upload**Answer: D**Explanation:Explanation/Reference:Explanation:Using multipart upload provides the following advantages:- Improved throughput - You can upload parts in parallel to improve throughput.- Quick recovery from any network issues - Smaller part size minimizes the impact of restarting a failed upload due to a network error.- Pause and resume object uploads - You can upload object parts over time. Once you initiate a multipart upload there is no expiry; you must explicitly complete or abort the multipart upload.- Begin an upload before you know the final object size.- You can upload an object as you are creating it.
