When you add 2V0-31.24 exam dumps to the cart, you should fill out your right email address, 2V0-31.24 Exam 5-star Rating with a Huge Customer Base.

NEW QUESTION: 1CORRECT TEXTWrite the full fw command and syntax that you would use to troubleshoot ClusterXL sync issues.**Answer:** Explanation:fw tab -s -t connections

NEW QUESTION: 2You are implementing a CIFS solution and will be using Virtual Data Movers. Which CIFS dynamic configuration information is contained within the Virtual Data Mover?**A.** Kerberos information**B.** Virtual checker configuration**C.** CIFS startup configuration**D.** DFS root ID information**Answer: A**Explanation:The CIFS servers that comprise the VDM store their dynamic configuration information in a configuration file system. This includes information such as local groups, shares, security credentials, and audit logs. A VDM can be loaded and unloaded, moved between Data Movers, or replicated to a remote Data Mover as an autonomous unit. The server's file systems, and all of the configuration data that allows clients to access the file system are available in one virtual container.

NEW QUESTION: 3A framework for security analysis is composed of a set of instructions, assumptions, and limitations to analyze and solve security concerns and develop threat free applications. Which of the following frameworks helps an organization in the evaluation of the company's information security with that of the industrial standards?**A.** The IBM Security Framework**B.** Microsoft Internet Security Framework**C.** Information System Security Assessment Framework**D.** Nortell's Unified Security Framework**Answer: C**

NEW QUESTION: 4A network technician is performing a tracert command to troubleshoot a website-related issue. The following output is received for each hop in the tracert:1 * * * Request timed out.2 * * * Request timed out.3 * * * Request timed out.The technician would like to see the results of the tracert command. Which of the following will allow the technician to perform tracert on external sites but not allow outsiders to discover information from inside the network?**A.** Enable split horizon to allow internal tracert commands to pass through the firewall**B.** Enable IGMP messages out and block IGMP messages into the network**C.** Install a backdoor to access the router to allow tracert messages to pass through**D.** Configure the firewall to allow echo reply in and echo request out of the network**Answer: D**Explanation:ExplanationTracert makes use of ICMP echo packets to trace the route between two hosts. For the command to be successful, the firewall has to allow incoming echo replies and outgoing echo requests.
