Applying the international recognition third party for payment for Service-Cloud-Consultant exam cram, and if you choose us, your money and account safety can be guaranteed.

NEW QUESTION: 1 A user is unable to make a video call from an endpoint that is registered to the Cisco VCS. To isolate the cause, which two menu choices should the user check first? (Choose two.)
A. Configuration > Call Policy
B. Status > Event Log
C. Status > System Information
D. Configuration > Dial Plan > Search Rules
E. Status > Registrations
F. Status > Search History

Answer: B, F Explanation: Explanation/Reference: Reference:

<http://www.cisco.com/c/dam/en/us/td/docs/telepresence/infrastructure/vcs/troubleshooting/Cisco-VCS-Troubleshooting-Procedures-X8-2.pdf>
Exp: Search history
The Search history page (Status > Search history) shows the decisions the VCS made to route a call, based on transforms, FindMe profile and search rules, zones and soon. This information is useful if calls are not hitting their intended destinations. It assists in working out why a call may be heading in a different direction to that which was expected.
VCS logs
There are three types of VCS logs which can be seen by going to Status > Logs > [type]. These are passive logs, which the administrator can view and filter, but cannot interact with in other ways.
Event Log
The Event Log shows key events that have occurred on the VCS including call events, login events and alarms. Red events indicate events that have failed; green indicates events that have succeeded. You can use the Filter options to search for specific URIs or keywords. The Event Log is the same as the messages files in the system snapshot.
Syslog
The Event Log can also be sent to one or more external syslog servers, for remote system monitoring. This is configured on the Logging page (Maintenance > Logging)

NEW QUESTION: 2 All new SIP users of Avaya Aura@ Conferencing for Aura conference bridges are administered on which Avaya Aura@ component or network element?
A. Session Manager
B. Communication Manager
C. Presence Server
D. System Manager
Answer: D Explanation: Avaya Aura@ Conferencing SIP users using SIP services require a Session Manager profile to be assigned.

NEW QUESTION: 3 Under which condition does UDP dominance occur?
A. when ACLs are in place to block TCP traffic
B. when WRED is enabled
C. when UDP flows are assigned a lower priority queue
D. when TCP traffic is in the same class as UDP
Answer: D

NEW QUESTION: 4Scenario:On PE7 which statement is correct regarding the "traffic-policing" policy-map?**A.** The "traffic-policing" QoS policy is using dual rate class-based traffic policing.**B.** The "traffic-policing" QoS policy will police the traffic matched by the "test12" ACL to 3 mbps and will drop all exceeding traffic.**C.** The "traffic-policing" QoS policy is applied to the Gi0/0/0/0 interface in the outbound direction.**D.** All incoming traffic not matched by the "test12" ACL to the Gi0/0/0/0 interface will be dropped.**Answer: B**Explanation:Explanation/Reference: Explanation:#show running-config policy-map#show policy-map
