NEW QUESTION: 1A. Option DB. Option CC. Option AD. Option B Answer: A Explanation: Explanation Since the number of calls is just a few times a week, there are many open source systems such as Jenkins which can be used as CI based systems. Jenkins can be used as an extensible automation server, Jenkins can be used as a simple CI server or turned into the continuous delivery hub for any project. For more information on the Jenkins CI tool please refer to the below link: * <https://jenkins.io/> Option A and C are partially correct, but since you just have 5 deployments per week, having separate instances which consume costs is not required. Option B is partially correct, but again having a separate system such as Opswork for such a low number of deployments is not required.

NEW QUESTION: 2 A customer wants to purchase a p460 node that has the lowest number of active cores on day one, with the ability to grow to the maximum number of cores over time. Which of the following should be ordered to meet the customer need? **A. 16 core node and upgrade to add 16 additional cores via a hardware MES. B. 32 core node with 4 active cores; use CUoD to permanently activate the other cores C. 32 core node with 4 active cores. Use CoD to temporarily activate the other cores as needed. D. 32 core node with 31 cores deactivated; activate cores as needed** **Answer: D**

NEW QUESTION: 3 The risk management team of a software project has decided that due to the lack of adequate talent in the company, development of a specific part of the system is under high risk, so the team has decided to outsource it. This is an example of which risk response? **A. Transfer B. Accept C. Avoid D. Share** **Answer: A**
