NEW QUESTION: 1You have a Microsoft 365 subscription.You need to add a user named Admin1 as an administrator of the Microsoft OneDrive for Business site for a user named User1. What should you do?**A.** From Setup My Sites, add a secondary administrator**B.** From the SharePoint admin center, select user profiles, and then select Manage User Properties**C.** Add Admin1 to the Site owners group**D.** From the SharePoint admin center, select user profiles, and then select Manage User Profiles. Select User1, and then select Manage site collection owners
Answer: D

NEW QUESTION: 2Your network contains an Active Directory forest named contoso.com. The forest contains three domains. All domain controllers run Windows Server 2012 R2. The forest has a two-way realm trust to a Kerberos realm named adatum.com. You discover that users in adatum.com can only access resources in the root domain of contoso.com. You need to ensure that the adatum.com users can access the resources in all of the domains in the forest. What should you do in the forest?**A.** Delete the realm trust and create a forest trust.**B.** Modify the incoming realm trust.**C.** Delete the realm trust and create three external trusts.**D.** Modify the outgoing realm trust.**Answer: D**Explanation: * A one-way, outgoing realm trust allows resources in your Windows Server domain (the domain that you are logged on to at the time that you run the New Trust Wizard) to be accessed by users in the Kerberos realm. * You can establish a realm trust between any non-Windows Kerberos version 5 (V5) realm and an Active Directory domain. This trust relationship allows cross-platform interoperability with security services that are based on other versions of the Kerberos V5 protocol, for example, UNIX and MIT implementations. Realm trusts can switch from nontransitive to transitive and back. Realm trusts can also be either one-way or two-way.Reference: Create a One-Way, Outgoing, Realm Trust

NEW QUESTION: 3A customer is planning to connect a Linux server to a FAS8200 using Brocade FC switches. During the initial configuration, the SVM does not log in to the fabric.
