NEW QUESTION: 1 You have launched an Amazon Elastic Compute Cloud (EC2) instance into a public subnet with a primary private IP address assigned, an internet gateway is attached to the VPC, and the public route table is configured to send all internet-based internet. Why is the internet unreachable from this instance?
A. The instance does not have a public IP address
B. The instance "Source/Destination check" property must be enabled
C. The Internet gateway security group must allow all outbound traffic
D. The instance security group must allow all inbound traffic
Answer: A

NEW QUESTION: 2 After 1 SHOCK from your AED, you reanalyze, and get a "no shock indicated" message. You check pulse and feel a strong pulse. What should you do next?
A. check whether EMS personnel have arrived
B. open the airway and check for breathing
C. remove the electrode pads
D. press down firmly on each electrode pad
Answer: B
Explanation: Here you have another "no shock indicated" message, but this time the pulse is present. A person who is D.Q! in VF ("n6 shock indicated", with a pulse. may be back in a good rhythm and may be a "save." The Heartsaver AED provider must determine whether or not the victim is breathing, and breathing well. If breathing has returned, determine if the breathing is adequate (adequate means you can see the chest rise). Answer a is incorrect because arrival of EMS personnel has no bearing on the first actions of the Heartsaver AED rescuer. Answer c is incorrect because the rescuer will never remove the electrode pads until directed to do so by the EMS professionals. Answer d is incorrect because you press down on the electrode pads only for a "loose electrodes" warning.

NEW QUESTION: 3 A customer is evaluating enterprise storage arrays from various vendors and requires that their mission critical data must be encrypted while at rest. What is required on the VSP to satisfy this requirement?
A. 2.5" self-encrypting drives for the capacity required
B. a key-generating encryption option on each SAS link
C. a license key
D. encryption Back-End

Directors (eBEDs) for dynamic encryption **Answer: C**
