NEW QUESTION: 1DRAG DROPYou have a desktop computer and a tablet that both run Windows 10 Enterprise.The desktop computer is located at your workplace and is a member of an Active Directory domain. The network contains an Application Virtualization (App-V) infrastructure. Several App-V applications are deployed to all desktop computers.The tablet is located at your home and is a member of a workgroup. Both locations have Internet connectivity.You need to be able to access all applications that run on the desktop computer from you tablet.Which actions should you perform on each computer? To answer, drag the appropriate action to the correct computer. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.Select and Place:**Answer:** Explanation:Explanation/Reference:Explanation:You can connect to your work computer by using Remote Desktop. You first need to enable Remote Desktop on the work computer. You then run the Remote Desktop Client on the home computer to connect to the work computer.With Remote Desktop Connection, you can connect to a computer running Windows from another computer running Windows that's connected to the same network or to the Internet. For example, you can use all of your work computer's programs, files, and network resources from your home computer, and it's just like you're sitting in front of your computer at work.To connect to a remote computer, that computer must be turned on, it must have a network connection, Remote Desktop must be enabled, you must have network access to the remote computer (this could be through the Internet), and you must have permission to connect. For permission to connect, you must be on the list of users. Before you start a connection, it's a good idea to look up the name of the computer you're connecting to and to make sure Remote Desktop connections are allowed through its firewall.

NEW QUESTION: 2 A. Option CB. Option DC. Option BD. Option A
Answer: B
Explanation: Devices of different types are connected with a straight through cable (patch cable). In this case, it is used to connect two devices of the same type. It is for this reason that the interface will display the line protocol down status.

NEW QUESTION: 3 vCloud Director requires a database. What is the minimum suggested configuration for that database server?
