**NEW QUESTION: 2**You need to meet the security requirements for external partners.Which Azure Active Directory features should you use?To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation: Box 1: B2BScenario: External partners must use their own credentials and authenticate with their organization's identity management solution.Azure Active Directory (Azure AD) business-to-business (B2B) collaboration lets you securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources. Developers can use Azure AD business-to-business APIs to customize the invitation process or write applications like self-service sign-up portals.Box 2: Access ReviewScenario: External partner logins must be audited monthly for application use by a user account administrator to maintain company compliance.Azure Active Directory (Azure AD) Access Reviews enable organizations to efficiently manage group memberships, access to enterprise applications, and role assignments.Administrators can use Azure Active Directory (Azure AD) to create an access review for group members or users assigned to an application. Azure AD automatically sends reviewers an email that prompts them to review access.References: <https://docs.microsoft.com/en-us/azure/active-directory/b2b/what-is-b2b>
