If you choose our SAP Certified Application Associate - SAP Master Data Governance exam prep vce, your chance of success must be **Pass C\_MDG\_1909 Test** greater than others, Free renewal fields for a year, get registered at Estruturit, and have high quality content to succeed in SAP SAP Certified Application Associate.

We insure here that once you place your order we will [New Introduction-to-IT Dumps Book](#) give your support in all aspects, The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, [C\\_BW4H\\_211 Test Online](#) but more importantly, it is necessary to have a good control over the annual propositional trend.

**NEW QUESTION: 1**Your network contains two DNS servers named DNS1 and DNS2 that run Windows Server 2012 R2. DNS1 has a primary zone named contoso.com. DNS2 has a secondary copy of the contoso.com zone.You need to log the zone transfer packets sent between DNS1 and DNS2.What should you configure?**A.** monitoring from DNS Manager**B.** debug logging from DNS Manager**C.** logging from Windows Firewall with Advanced Security**D.** a Data Collector Set (DCS) from Performance Monitor**Answer: A****Explanation:**Monitoring DNS with the DNS Console The DNS management console includes functionality that enables you to use the console to monitor DNS activity:  
\*Event Logging tab: You can access the Event Logging tab located within the Properties dialog box of the DNS server to specify the DNS events that you want to monitor. Through the Event Logging tab, you can limit the events which are written to the DNS Events log.  
\*Monitoring tab: The Monitoring tab is also located within the Properties dialog box of the DNS server. This tab allows you to test querying of the DNS server.  
Reference: Monitoring and Troubleshooting DNS Your network contains multiple subnets. On one of the subnets, you deploy a server named Server1 that runs Windows Server 2012 R2.

**NEW QUESTION: 2**Refer to exhibit.An organization has Palo Alto Networks NGFWs that send logs to remote monitoring and security management platforms. The network team has reported excessive traffic on the corporate WAN.How could the Palo Alto Networks NGFW administrator reduce WAN traffic while maintaining support for all existing monitoring/security platforms?**A.** Configure log compression and optimization features on all remote firewalls.**B.** Forward logs from external sources to Panorama for correlation, and from Panorama send them to the NGFW.**C.** Any configuration on an M-500 would address the insufficient bandwidth concerns.**D.** Forward logs from firewalls only to Panorama and have Panorama forward logs to other external services.**Answer: A**

**NEW QUESTION: 3**Which benefit does In-Service Software Upgrades (ISSU) provide?**A.** Upgrades members of an IRF virtual switch one at a time to avoid services disruption**B.** Schedules and performs switch upgrades through HP Intelligent Management Center (IMC)**C.** Upgrades members of theIRF virtual switch simultaneously to ensure all members use the same software version**D.** Automatically checks for software updates on the HP Websites, downloads the new software, and upgrades the switches duringnon-**Answer: A**

**NEW QUESTION: 4**You need to meet the technical requirements for the third-party Windows driver.Which cmdlet should you run on Server1?**A.** Import-MdtDriver**B.** Import-WdsDriverPackage**C.** Add-WindowsDriver**D.** Add-WdsDriverPackage**Answer: A**  
**Explanation:**Explanation/Reference:Explanation:/ Only MDT is used to deploy Windows to

tablets./ Add a third-party Windows driver that will be deployed to tablets.

**Testlet 1**

**Active Directory Environment**

The network contains a single Active Directory forest named relecloud.com. The forest contains a single domain. All servers run Window Server 2012 R2. All client computers, except for a computer named Computer1, run Windows 7 Service Pack 1 (SP1). Computer1 was purchased recently and runs Windows 8.1. All of the servers are members of the domain. All of the client computers, except for the computers in the quality assurance department, are members of the domain. Relecloud has the users described as shown in the following table.

**Network Environment**

Enter your title here

The network contains the servers configured as shown in the following table. Server3 has two file shares named Software and Updates. Microsoft Office Professional Plus 2013 is copied to the Software share. Office Professional Plus 2013 RemoteApp programs are published. The Windows Deployment Services server role was installed recently on Server7. An initial WDS configuration was performed, but only an image named Image10 was imported to Server7.

**Images**

Relecloud has the images described as shown in the following table. Computer1 will be used for testing and creating new images. A desktop computer named Computer2 does not support PXE.

**User Types**

Relecloud has the following users: Users in the sales department, who travel often and are not connected to the company network or the Internet. All other users, who work from the office and are connected to the company network always.

**Problem Statements**

Relecloud identifies the following issues: New client computers do not support hardware virtualization. Relecloud does not have an inventory of the current client computers. A new application named App1 for the users in the sales and marketing departments cannot be deployed because the application conflicts with other locally installed applications. Relecloud plans to purchase a hardware build for all new client computers. The device drivers for the disk controllers, the display adapters, and the camera on the new computers are not included in the Windows 8.1 installation.

**Planned Changes**

Relecloud plans to implement the following changes: Replace all Windows 7 SP1 computers with new computers. Deploy Windows 8.1 to all new client computers.

**Technical Requirements**

Relecloud identifies the following technical requirements: Gather inventory from the current client computers in the development and quality assurance departments. Ensure that users can use Office Professional Plus 2013 after the new client computers are deployed. Use the Microsoft Assessment and Planning (MAP) Toolkit to collect computer inventory information. Use the principle of least privilege, whenever possible. Minimize administrative effort, whenever possible.

**Deployment Requirements**

Relecloud identifies the following deployment requirements: Only Image3 must be deployed to the new client computers in the accounting department. Only Image4 and Image5 must be deployed to the new client computers in the research department. A multicast transmission must be created for the new client computers to the customer service and quality assurance departments. All of the new computers in the customer service department must be joined to the domain. Only Image2 must be deployed to the new customer service department computers. For the customer service department, ten of the new computers must have two partitions, and five of the new computers must have three partitions. The partitions must be created as part of an unattended installation. All of the new computers in the quality assurance department must be members of a workgroup named QA. This must be configured as part of the unattended installation. Only Image2 must be deployed to the new quality assurance department computers.

**Application requirements**

Sales and marketing department users must be able to use App1 always. All of the new computers that have Office Professional Plus installed must use only Office Professional Plus 2013 SP1.

**Performance Requirements**

Relecloud identifies the following performance requirements: Minimize the amount of network traffic and time required for the deployment of the new client computers. Include the device drivers for all of the devices on the newly deployed computers. Minimize the CPU usage of App1 on the client computers.

Relecloud identifies the following image requirements: Create a new image of the generalized Windows 8.1 installation from Computer1. Use an answer file named Image4.xml to deploy Image4 by using WDS.
