NEW QUESTION: 1The SteelHead makes a connection to its peers using the Out of Band splice. What does the OOB splice do?**A.** It is control channel that is used to exchange version and feature information between SteelHeads.**B.** All optimized connections flow over the OOB splice.**C.** The OBB splice is only used by SteelHead mobile clients.**D.** The OBB splice is only used to check the peer SteelHead is available.**Answer: A**Explanation:Explanation/Reference:An OOB splice is an independent, separate TCP connection made on the first connection between two peer Steelhead appliances used to transfer version, licensing and other OOB data between peer Steelhead appliances. An OOB connection must exist between two peers for connections between these peers to be optimized. If the OOB splice dies all optimized connections on the peer Steelhead appliances will be terminated.References:
