NEW QUESTION: 1Where can you view hardware failure events in ProLiant 300/600/700 Series servers?**A.** Firmware Maintenance CDB**B.** ORCAC**C.** RBSUD**D.** Integrated Management Log (IML)
Answer: DExplanation:Integrated Management Log - The diagnostic utility can add notes, clear, and mark for repair items in the IML (on supported systems). The IML records system events, critical errors, power-on messages, memory errors, and any catastrophic hardware or software errors that typically cause systems to fail. The errors and events might be discovered during POST or by the System Management driver during normal operations. IML records are dated and have severity levels and error counts that can be used to help isolate the problem.

NEW QUESTION: 2Which statement describes the action to assure the system platform was installed correctly?**A.** Immediately after the installation, verify the DVD is ejected from the drive and that the server reboots.**B.** From the system management console browser, verify domain-0 and cdom are running**C.** From the laptop connected to the network, ping the dom0 IP address and verify a successful response.**D.** After connecting the server using PuTTY and logging in as root, verify there are no errors when running the xm list command.**Answer: D**
