F. IPv6 fragmentation is performed on all devices in the forwarding path.
G. IPv6 fragmentation is performed only on the source of the traffic.
Answer: A,G

NEW QUESTION: 2 You are managing a project based on a Waterfall model. You define a project and a project plan in Oracle Project Portfolio Management with tasks and subtasks applicable to each of the phases of the project: Initiation, Discovery, Design, Build, Test, and Deploy. As a project manager, you want to define deliverables for your project requirements that are elucidated during the Discovery phase of your project. You now want to understand how the inheritance between requirements, tasks, and deliverables works. Identify the two correct statements in this respect. (Choose two.)
A. A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement.
B. The association of a deliverable with a task is dependent on associating a requirement with a task.
C. A deliverable associated with a requirement is automatically associated with the tasks created for that requirement.
D. You associate a deliverable with a task, independent of associating a requirement with a task.
Answer: A,D Explanation: Explanation

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapem/define-project-deliverables>. Associate deliverables with one or many tasks or requirements at any level. Associate existing deliverables to tasks or requirements or create deliverables directly for tasks or requirements. You can delete a deliverable in New status if it is not associated with tasks or requirements. Can deliverables for projects and tasks be inherited from associated requirements? No. A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. You associate a deliverable with a task, independent of associating a requirement with a task.

NEW QUESTION: 3

HSRPは、優先度が最も高いデバイスを決定するためにどの2つの値を使用できますか？
