**NEW QUESTION: 1** Which statement is true about security rules for Database Deployments? **A.** They are used to encrypt communication between Database Deployments. **B.** They are used only for configuring external server access to Database Deployments and do not impact how network groups communicate. **C.** They are used to map an external user to a database user to allow the user to communicate with and access the database. **D.** They define a specific communication path, which consists of a source, destination, and protocol-port combination over which communication is allowed. **Answer: D**  
Explanation: Explanation/Reference:  
Explanation: On the Access Rule you can define the following: Source Hosts from which traffic is allowed. Possible values are DB, PUBLIC-INTERNET, or a custom value in the form of an IP address. Destination Security list to which traffic is allowed. This will be DB, the ora\_db security list for the deployment. Ports Port or range of ports for the rule. References:  
<https://docs.oracle.com/en/cloud/paas/database-dbaas-cloud/csdbi/service-console-access-rules-page.html>
