Your Actual 350-701 Exam Dumps PDF.

NEW QUESTION: 1When deploying an Oracle Management Cloud agent, an error was encountered. What is one method to troubleshoot this?
A. Log in to Cloud.oracle.com and in MyServices check in the Agents tab for any errors and then select the "redeploy" check box.
B. Load data into the Management Repository if found empty.
C. Verify that a registration key value had been input and that the key has a valid status.
D. Review IP addresses of agents for any conflicts and reassign the agent being deployed to a new address range.
Answer: C

NEW QUESTION: 2You must create a search results page for the real estate properties that are available in each real estate office. You need to display the search result for the internet site collection. Which types of files should you create? (Each correct answer presents part of the solution. Choose all that apply.)
A. HTML (.html)
B. Active Server Page (.aspx)
C. JavaScript (.js)
D. XML (.xml)
E. Master Page (.master)
Answer: B, E
Explanation: Explanation/Reference: Note: * Master Page defines "placeholders" which can be overridden in child page * Content Page of a Master Page defaults to default.aspx

NEW QUESTION: 3What is DB2 Express?
A. DB2 Express is a version of DB2 that will only run on handhelds and PDAs and that is targeted for the purposes of sales demonstrations.
B. DB2 Express is a faster version of DB2 that is more powerful and feature-rich than the regular DB2 version.
C. DB2 Express is a wizard in DB2 that allows for the quick installation and setup of the DB2 product.
D. DB2 Express is an edition of DB2 specifically targeted towards SMBs and ISVs.
Answer: D

NEW QUESTION: 4If you back up a database without connecting to the recovery catalog, which operations will cause the recovery catalog to be updated? (Choose all that apply.)
A. The next time you connect RMAN to just the recovery catalog
B. Connecting to the recovery catalog and issuing the resync all databases command
C. The next time you connect to the recovery catalog and the target database with RMAN
D. The next time you are connected to the target database and the recovery catalog database and issue the resync command
E. The next time you back up the database when you are also connected to the recovery catalog and the target database

Answer: D,EExplanation:Explanation/Reference:Explanation:Deciding When to Resynchronize the Recovery CatalogRMAN automatically resynchronizes the recovery catalog whenRMAN is connected to a target database and recovery catalog and you have executed RMANcommands. Thus, you should not need to manually run the RESYNC CATALOG command very often.
