**NEW QUESTION: 3**Which type of firewall can act on the behalf of the end device?**A.** Application **B.** Packet**C.** Proxy**D.** Stateful packet**Answer: C**Explanation:Application firewalls, as indicated by the name, work at Layer 7, or the application layer of the OSI model.These devices act on behalf of a client (aka proxy) for requested services.Because application/proxy firewalls act on behalf of a client, they provide an additional "buffer" from port scans, application attacks, and so on. For example, if an attacker found a vulnerability in an application, the attacker would have to compromise the application/proxy firewall before attacking devices behind the firewall. The application/proxy firewall can also be patched quickly in the event that a vulnerability is discovered. The same may not hold true for patching all the internal devices.Source:
