**NEW QUESTION: 3**You are working with your project team to identify the project activities within your project. Which of the following is NOT a tool and technique that will be useful in defining the project activities? **A.** Precedence diagramming method **B.** Decomposition **C.** Templates **D.** Rolling wave plan **Answer: A**  
**Explanation:**The precedence diagramming method is not a tool and technique that will be used during the activity definition process. Precedence diagramming method (PDM) is used in critical path methodology for building a project schedule network diagram that uses boxes or rectangles, referred to as nodes, to represent activities, and join each other with arrows that show the logical relationship that exists between them. The tools and techniques used in defining the activity process are as follows:  
Decomposition: It is used to further divide the project work package into a more smaller and convenient form called activities. Rolling Wave Planning: It is a form of progressive elaboration planning where the work to be accomplished in the near term is planned in detail and future work is planned at a higher level of WBS. Templates: It is an activity list or a part of the activity list taken from the previous project and used in a new project. Expert Judgement: The skilled members in a project team or other experts who develop project scope statements can help provide knowledge in defining activities.

**NEW QUESTION: 4**When loading Salaries into Workforce, which Property should the values be loaded to? **A.** OWP\_Expense Amount **B.** OWP\_Value **C.** OWP\_Salary Basis **D.** OWP\_Gross Earnings **Answer: C**  
**Explanation:**Explanation/Reference:Explanation:The salary basis specifies the frequency of the amount sent to payroll and stored as salary, such as annual or hourly amount. It also specifies the payroll element and input value that feeds the salary to payroll and the grade rate that provides the salary range. References:
