**NEW QUESTION: 3**You are deploying a high-density wireless setup in a conference center using Cisco Aironet 3700iAPs as you have noCisco air not 3700e APs available. The power levels for all the APs should be set between 4 and 5 which configurationoption is needed to achieve this goal.?**A.** Select the TPC values between 4 dBm and q dBm**B.** Manually configure the power levels of the 802.11b and 80211a radios of all APs either 4 or 5**C.** Select the TPC values between 11 dNm and 8 dBm**D.** Select the tcp values between 4 dBm and dBm**Answer: B**

**NEW QUESTION: 4**You have a computer that runs Windows Vista Service Pack 2 (SP2).You need to upgrade the computer to Windows 7.What should you do?**A.** From Windows Vista, run Setup.exe from the Windows 7 installation media and select the Custom (advanced) option.**B.** From Windows Vista, run Setup.exe from the Windows 7 installation media and select the Upgrade option.**C.** Start the computer from the Windows 7 installation media and select the Custom (advanced) option.**D.** Start the computer from the Windows 7 installation media and

select the Upgrade option.**Answer: B**Explanation:Upgrading Windows Vista to Windows 7 instructionsAccess the Windows 7 installation source and double-click Setup.exe. When prompted by User Account Control, click Allow. This loads the Install Windows page. Click Install Now.Other NotesYou can upgrade computers running Windows Vista to Windows 7. When you upgrade from Windows Vista to Windows 7, all documents, settings, applications, and user accounts that existed on the computer running Windows Vista are available when the upgrade is finished. The advantage to an upgrade is that it allows you to keep the current application configuration. When you perform a migration, you need to reinstall the user's applications on the new computer. As mentioned previously, this can be problematic in organizations that are not careful about keeping track of which specific set of applications are installed on each user's computer. Prior to attempting to perform the upgrade from Windows Vista to Windows 7, you should run the Windows 7 Upgrade Advisor. The Windows 7 Upgrade Advisor is an application that you can download from Microsoft's Web site that will inform you if Windows 7 supports a computer running the current hardware and software configuration of Windows Vista. Prior to running the Windows 7 Upgrade Advisor, you should ensure that all hardware that you want to use with Windows 7, such as printers, scanners, and cameras, are connected to the computer. The Upgrade Advisor generates a report that informs you of which applications and devices are known to have problems with Windows 7. A similar compatibility report is generated during the upgrade process, but the version created by the Windows 7 Upgrade Advisor is more likely to be up to date.
