Professional design.

NEW QUESTION: 1A. Option AB. Option CC. Option BD. Option D**Answer: D****Explanation:**If the IM Flexible Single Master Operation (FSMO) role holder is also a global catalog server, the phantom indexes are never created or updated on that domain controller. (The FSMO is also known as the operations master.) This behavior occurs because a global catalog server contains a partial replica of every object in Active Directory. The IM does not store phantom versions of the foreign objects because it already has a partial replica of the object in the local global catalog. For this process to work correctly in a multidomain environment, the infrastructure FSMO role holder cannot be a global catalog server. Be aware that the first domain in the forest holds all five FSMO roles and is also a global catalog. Therefore, you must transfer either role to another computer as soon as another domain controller is installed in the domain if you plan to have multiple domains.

NEW QUESTION: 2**HOTSPOT****Answer:** Explanation:

NEW QUESTION: 3空白を埋めて、OAuthを使用してJSON形式でリソースを取得するRESTful APIを呼び出すcURLコマンドを完成させます。**Answer:** Explanation:GET,Accept,Authorization
Explanation:See the solution below.Reference:
