NEW QUESTION: 1 For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation Box 1: No Box 2: Yes Partial table lists the events that your bot can receive and take action on. Box 3: Yes The messageReaction event is sent when a user adds or removes his or her reaction to a message which was originally sent by your bot. Reference: <https://docs.microsoft.com/en-us/microsoftteams/platform/resources/bot-v3/bots-notifications>

NEW QUESTION: 2 An IBM WebSphere MQ client application puts messages onto remote queue RQ on queue manager QM1, which resolves to the local queue LQ on queue manager QM2. A new version of the application has been deployed that has the capability to put messages greater than 4MB. The administrator changed the max message length attributes for the queue managers, transmission queue, sender-receiver channels and LQ to handle the larger messages. The administrator was later notified that messages greater than 4MB are still not reaching LQ. The most likely cause of the problem is the max message length attribute: **A.** was not set on the environment variable MQSERVER **B.** of RQ was not changed **C.** in file qm.ini was not changed **D.** of the server connection channel was not changed **Answer: D**

NEW QUESTION: 3 It is a kind of malware (malicious software) that criminals install on your computer so they can lock it from a remote location. This malware generates a pop-up window, webpage, or email warning from what looks like an official authority. It explains that your computer has been locked because of possible illegal activities on it and demands payment before you can access your files and programs again. Which of the following terms best matches the definition? **A.** Ransomware **B.** Spyware **C.** Adware **D.** Riskware **Answer: A** Explanation: Explanation Ransomware is a type of malware that can be covertly installed on a computer without knowledge or intention of the user that restricts access to the infected computer system in some way, and demands that the user pay a ransom to the malware operators to remove the restriction. Some forms of ransomware systematically encrypt files on the system's hard drive, which become difficult or impossible to decrypt without paying the ransom for the encryption key, while some may simply lock the system and display messages intended to coax the user into paying. Ransomware typically propagates as a Trojan. References: <https://en.wikipedia.org/wiki/Ransomware>
