HPE7-M03 is the authentic study guides with the latest exam material which can help you solve all the difficulties in the actual test, Mark questions for review later on.

**NEW QUESTION: 1**Your company has one main office and one new branch office. A local administrator manages the branch office. The network consists of one Active Directory domain. All domain controllers run Windows Server 2008. You create a new organizational unit (OU) that contains all the computer accounts for the new branch office. You configure a server in the main office to test and approve all new software updates. You configure Microsoft Windows Server Update Services (WSUS) 3.0 to deploy all approved updates to the environment. You need to recommend an update management solution for the new branch office to meet the following requirements: - Only approved updates can be installed in the branch office. - The amount of network bandwidth used to download updates from Microsoft Update must be minimized. - The local administrator must be able to select which approved updates are installed on computers in the branch office. What should you recommend?**A.** In the main office, install and configure a WSUS 3.0 server as a child server. Configure a Group Policy for the new OU so that all computers receive updates from the new WSUS server.**B.** In the new branch office, install and configure a WSUS 3.0 server as a stand-alone server. Configure a Group Policy for the new OU so that all computers receive updates from the new WSUS server.**C.** In the main office, install and configure a WSUS 3.0 server as a stand-alone server. Configure a new Group Policy for the new OU so that all computers receive updates from the new WSUS server.**D.** In the new branch office, install and configure a WSUS 3.0 server as a child server. Configure a Group Policy for the new OU so that all computers receive updates from the new WSUS server.**Answer: D**

**NEW QUESTION: 2** A network engineer is disabling split horizon on a point-to-multipoint interface that is running RIPv2. Under which configuration mode can split horizon be disabled?  
**A.** router(config)#**B.** router(config-rtr)#**C.** router(config-riping)#**D.** router(config-if)#**Answer: A**

**NEW QUESTION: 3** You administer a Microsoft SQL Server 2014 database. You want to make a full backup of the database to a file on disk. In doing so, you need to output the progress of the backup. Which backup option should you use?  
**A.** IN IT **B.** STAT **C.** CHECKSUM **D.** COMPRESSION  
**Answer: B**  
Explanation: STATS is a monitoring option of the BACKUP command. STATS [ =percentage ] Displays a message each time another percentage completes, and is used to gauge progress. If percentage is omitted, SQL Server displays a message after each 10 percent is completed. The STATS option reports the percentage complete as of the threshold for reporting the next interval. This is at approximately the specified percentage; for example, with STATS=10, if the amount completed is 40 percent, the option might display 43 percent. For large backup sets, this is not a problem, because the percentage complete moves very slowly between completed I/O calls. References:
