Explanation:**B.** Oracle CEP is the java server for the development and deployment of high performance event driven applications.**C.** Oracle CEP is light weight java application container based on equinox OSGI which provides support for continuous query language (Oracle CQL).
Introduction to Oracle Complex Event Processing Oracle CEP (formally known as the WebLogic Event Server) is a Java server for the development and deployment of high-performance event driven applications. It is a lightweight Java application container based on Equinox OSGi, with shared services, including the Oracle CEP Service Engine, which provides a rich, declarative environment based on Oracle Continuous Query Language (Oracle CQL) - a query language based on SQL with added constructs that support streaming data - to improve the efficiency and effectiveness of managing business operations Reference
