**NEW QUESTION: 1**Which two actions should the Customer Success Manager take throughout the quarter to support their customer? (Choose two.)**A.** Manage the service issues and escalations**B.** Join the sales and marketing strategy meetings**C.** Observe the online image of the customer**D.** Review and update the success plan for ongoing activities**E.** No action is necessary as long as the health index is green**Answer: A,D**

**NEW QUESTION: 2**Scenario: A Junior Citrix Administrator needs to create a content switching virtual server on a Citrix ADC high availability (HA) pair. The NSIP addresses are 192.168.20.10 and 192.168.20.11. The junior administrator connects to NSIP address 192.168.20.10 and saves the changes.The following day, a Senior Citrix Administrator tests the new content switching virtual server, but it is NOT working. The senior administrator connects to the HA pair and discovers that everything the junior administrator configured is NOT visible.Why has the Citrix ADC lost the newly added configurations?**A.** The junior administrator connected to the NSIP of the secondary Citrix ADC in the HA pair.**B.** Both Citrix ADCs in the HA pair restarted overnight.**C.** The junior administrator made the changes and did NOT force a failover to save the configurations.**D.** The Citrix ADC appliances have different firmware versions.**Answer: B**

**NEW QUESTION: 3**Note: This question is part of a series of questions that use the same set of

answer choices. An answer choice may be correct for more than one question in the series. Your network contains a System Center 2012 Configuration Manager environment that contains six servers configured as shown in the following table. Server5 and Server6 are in the perimeter network, while Server1, Server2, Server3, and Server4 are in the internal network. You plan to deploy servers to the perimeter network by using Configuration Manager. The operating system for each server will be installed over the network. The installations will begin automatically, as soon as each server starts for the first time. You need to recommend a solution to minimize the amount of network traffic between the perimeter network and the internal network during the installation of the operating systems. What should you do? **A.** Install a PXE-enabled protected distribution point on Server6. **B.** Install a software update point on Server3. **C.** Install a PXE-enabled protected distribution point on Server4. **D.** Install a management point on Server2. **E.** Install a protected distribution point on Server1. **F.** Install Network Load Balancing (NLB) on Server3. **G.** Install the Windows Cluster service on Server3. **H.** Install Network Load Balancing (NLB) on Server6. **I.** Install the Windows Cluster service on Server6. **J.** Install an enrollment proxy point on Server6. **K.** Install a management point on Servers. **L.** Configure the Exchange connector on Server3. **M.** Configure IIS to support only HTTP on Server3. **N.** Configure IIS to support only HTTPS on Server5. **O.** Install Windows Server Update Services (WSUS) on Server3.

**Answer: A** Explanation: Explanation/Reference: A protected distribution point will limit deployment to a predefined boundary. (the perimeter network) With PXE enabled the servers will be installed when they boot.
