Do you want to have a new change about your life, So our SPLK-4001 test engine will meet your needs because our price is much lower than others, You can more easily master and simplify important test sites with SPLK-4001 study materials.

And you will find the quality of the SPLK-4001 learning quiz is the first-class and it is very convenient to download it, Now what you should do is seizing this opportunity to be a champion with SPLK-4001 practice test materials.

For the preparation with the Splunk SPLK-4001 exam you'll need tactic to study proficiently and efficiently.

NEW QUESTION: 1When planning a partition scheme, which of the following directories could be considered for separate partitions? (Choose three.)**A.** /opt**B.** /lib**C.** /var**D.** /home**E.** /etc

Answer: D

NEW QUESTION: 2What is guaranteed in an Azure Service Level Agreement (SLA) for virtual machine?**A.** feature availability**B.** bandwidth**C.** uptime**D.** performance**Answer: C****Explanation:** The SLA for virtual machines guarantees 'uptime'. The amount of uptime guaranteed depends on factors such as whether the VMs are in an availability set or availability zone if there is more than one VM, the distribution of the VMs if there is more than one or the disk type if it is a single VM. The SLA for Virtual Machines states: * For all Virtual Machines that have two or more instances deployed across two or more Availability Zones in the same Azure region, we guarantee you will have Virtual Machine Connectivity to at least one instance at least 99.99% of the time. * For all Virtual Machines that have two or more instances deployed in the same Availability Set or in the same Dedicated Host Group, we guarantee you will have Virtual Machine Connectivity to at least one instance at least 99.95% of the time. * For any Single Instance Virtual Machine using Premium SSD or Ultra Disk for all Operating System Disks and Data Disks, we guarantee you will have Virtual Machine Connectivity of at least 99.9%.

NEW QUESTION: 3Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in the series.
Start of repeated scenario
Contoso. Ltd. has a Microsoft SQL Server environment that includes SQL Server Integration Services (SSIS), a data warehouse, and SQL Server Analysis Services (SSAS) Tabular and multi-dimensional models. The data warehouse stores data related to your company sales, financial transactions and financial budgets. All data for the data warehouse originates from the company's business financial system. The data warehouse includes the following tables:
You must implement a partitioning scheme for the fact. Transaction table to move older data to less expensive storage. Each partition will store data for a single calendar year, as shown in the exhibit (Click the Exhibit button.) You must align the partitions. The company plans to use Microsoft Azure to store older records from the data warehouse. You must modify the database to enable the Stretch Database capability.
End of repeated scenario
You need to perform the first step to partition the fact. Transaction table. How should you complete the Transact-SQL statement? To answer, select the appropriate Transact-SQL segments in the answer area.
Answer: Explanation: Explanation
CREATE PROCEDURE [DateRange] (INT) AS RANGE LEFT
