NEW QUESTION: 2Refer to the exhibit. Hosts in network 192.168.2.0 are unable to reach hosts in network 192.168.3.0. Based on the output from RouterA, what are two possible reasons for the failure? (Choose two.)**A.** The IP address that is configured on S0/0 of RouterB is not in the correct subnet.**B.** The encapsulation that is configured on S0/0 of RouterB does not match the encapsulation that is configured on S0/0 of RouterA.**C.** Interface S0/0 on RouterA is configured with an incorrect subnet mask.**D.** The cable that is connected to S0/0 on RouterA is faulty.**E.** Interface S0/0 on RouterA is not receiving a clock signal from the CSU/DSU.**F.** Interface S0/0 on RouterB is administratively down.**Answer: B, E**Explanation:Explanation/Reference:Explanation: From the output we can see that there is a problem with the Serial 0/0 interface. It is enabled, but the line protocol is down. This could be a result of mismatched encapsulation or the interface not receiving a clock signal from the CSU/DSU.

NEW QUESTION: 3You must ensure that the external party cannot access the data in the SSN column of the Person table. Will each protection method meet the requirement? To answer, drag the appropriate responses to the correct protection methods. Each response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.**Answer:** Explanation: ExplanationBox 1: YesYou can configure Always Encrypted for individual database columns containing your sensitive data. When setting up encryption for a column, you specify the information about the encryption algorithm and cryptographic keys used to protect the data in the column.Box 2: NoBox 3: YesIn SQL Database, the VIEW permissions are not granted by default to the public fixed database role. This enables certain existing, legacy tools (using older versions of DacFx) to work properly. Consequently, to work with encrypted columns (even if not decrypting them) a database administrator must explicitly grant the two VIEW permissions.Box 4: NoAll cryptographic keys are stored in an Azure Key Vault.References: <https://docs.microsoft.com/en-us/sql/relational-databases/security/encryption/always-encrypted-database-engine>

NEW QUESTION: 4According to the Central Limit Theorem:**A.** the mean of an exponential distribution is smaller than the median**B.** none of the above**C.** the median and the mean have the same value in a symmetric distribution**D.** the mode of a normal distribution is also the mean**E.** the mean, median and mode of a normal distribution all have the same value**Answer: B**
