You will be allowed to free update your C_TS414_2023 pdf vce one-year after you make payment.

NEW QUESTION: 1Your current log analysis application takes more than four hours to generate a report of the top 10 users of your web application. You have been asked to implement a system that can report this information in realtime, ensure that the report is always up to date, and handle increases in the number of requests to your web application. Choose the option that is cost-effective and can fulfill the requirements.**A.** Post your log data to an Amazon Kinesis data stream, and subscribe your log-processing application so that is configured to process your logging data.**B.** Publish your data to Cloud Watch Logs, and configure your application to autoscale to handle the load on demand.**C.** Publish your log data to an Amazon S3 bucket. Use AWS CloudFormation to create an AutoScaling group to scale your post-processing application which is configured to pull down your log files stored on Amazon S3.**D.** Create a multi-AZ Amazon RDS MySQL cluster, post the logging data to MySQL, and run a mapreduce job to retrieve the required information on user counts.**Answer: A**
Explanation: Explanation When you see Amazon Kinesis as an option, this becomes the ideal option to process data in real time. Amazon Kinesis makes it easy to collect, process, and analyze real-time, streaming data so you can get timely insights and react quickly to new information. Amazon Kinesis offers key capabilities to cost effectively process streaming data at any scale, along with the flexibility to choose the tools that best suit the requirements of your application. With Amazon Kinesis, you can ingest real-time data such as application logs, website click streams, IoT telemetry data, and more into your databases, data lakes and data warehouses, or build your own real-time applications using this data. For more information on Amazon Kinesis, please visit the below URL: * <https://aws.amazon.com/kinesis>

NEW QUESTION: 2**A.** Thirds Class **B.** Second Class **C.** Fourth Class **D.** First Class **Answer: D**

NEW QUESTION: 3 For data to be available universally, the "measured" field in CM must be administered to which setting? **A.** Measured: internal **B.** Measured: survivable **C.** Measured: external **D.** Measured: both **Answer: D**
