NEW QUESTION: 2ScenarioPlease read this scenario prior to answering the questionYou have been assigned the role of Chief Enterprise Architect within a leading outsourcing services company. The company has over 20,000 outsourcing professionals and works on some of the world's largest outsourcing projects. Outsourcing services include business processes, infrastructure, and service management. The company also provides business consulting services.With numerous service areas and a large number of diverse engagements in progress at any given time, overall engagement management within the company has become challenging. The company does not want to risk its outstanding reputation or its international certifications and CMM ratings.The company has an established an Enterprise Architecture program based on TOGAF 9, sponsored jointly by the Chief Executive Officer and Chief Information Officer. An Architecture Board has been formed comprised of IT staff executives and executives from the major service areas and consulting practice.The Enterprise Architecture (EA) team has been working with the Strategic Planning team to create a strategic enterprise architecture to address these issues. The EA team has defined a framework and held workshops with key stakeholders to define a set of architecture principles to govern the architecture work.They have completed an Architecture Vision at a strategic level and laid out Architecture Definitions for the four domains. They have set out an ambitious vision of the future of the company over a five-year period.This includes a solution architecture including three distinct transformations.The CIO has made it clear that prior to the approval of the detailed implementation and Migration plan, the EA team will need to assess the risks associated with the proposed architecture. He has received concerns from some of the vice presidents across the company that the proposed architecture may be too ambitious and they are not sure it can produce sufficient value to warrant the attendant risks.Refer to the Scenario You have been asked to recommend an approach to satisfy these concerns.Based on TOGAF, which of the following is the best answer?**A.** Before preparing the detailed Implementation and Migration plan, the EA team should review and consolidate the gap analysis results from Phases B to D to understand the transformations that are required to achieve the proposed Target Architecture. The EA team should then assess the readiness of the organization to undergo change. Oice the Solution Architecture has been assembled, it should be analyzed using a state

evolution table to determine the Transition Architectures.**B.** The EA team should gather information about potential solutions from the appropriate sources. Once the Solution Architecture has been assembled; it should be analyzed using a state evolution table to determine the Transition Architectures. A value realization process should then be established to ensure that the concerns raised are addressed.**C.** The EA team should apply the Business Transformation Readiness Assessment technique. This will allow the risks associated with the transformations to be identified and mitigated for. It will also identify improvement actions to be worked into the Implementation and Migration Plan. The Business Value Assessment technique should then be used to determine the business value and associated risks for the transformation.**D.** The EA team should apply an interoperability analysis to evaluate any potential issues across the Solution Architecture. This should include the development of a matrix showing the interoperability requirements. Once all of the concerns have been resolved, the EA team should finalize the Architecture Roadmap and the Implementation and Migration Plan.**Answer: C**

NEW QUESTION: 3You have four computers that run Windows 10. The computers are configured as shown in the following table.On Computer1, you create a user named User1. In the domain, you create a user named User2.You create the groups shown in the following table. You need to identify to which computers User1 can sign in, and to which groups you can add User2.What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.**Answer:** Explanation:ExplanationBox 1: Computer 1 only.User1's account was created on Computer1. The account is a local account on Computer1. Therefore, User1 can only sign in to Computer1.Box 2: Group5 only.User2's account was created in the domain. A domain is a security boundary. Therefore, you can only add User2 to groups in the domain.
