Try to manage some extra time, in order to clear the concept of topics.

NEW QUESTION: 1You have been assigned a project to develop a Web site for a construction company. You plan to develop a Web site and want to use cascading style sheets (CSS) as it helps you to get more control over the appearance and presentation of your Web pages and also extends your ability to precisely specify the position and appearance of the elements on a page and create special effects. You want to define styles for individual elements of a page. Which type of style sheet will you use?**A.** Embedded Style Sheet**B.** Inline Style Sheet**C.** Internal Style Sheet**D.** External Style Sheet**Answer: B****Explanation:**Cascading style sheets (CSS) are used so that the Web site authors can exercise greater control on the appearance and presentation of their Web pages. And also because they increase the ability to precisely point to the location and look of elements on a Web page and help in creating special effects. Cascading Style Sheets have codes, which are interpreted, Applied by the browser on to the Web pages and their elements. There are three types of cascading style sheets. External Style Sheets Embedded Style Sheets Inline Style Sheets External Style Sheets are used whenever consistency in style is required throughout a Web site. A typical external style sheet uses a .css file extension, which can be edited using a text editor such as a Notepad. Embedded Style Sheets are used for defining styles for an active page. Inline Style Sheets are used for defining individual elements of a page. Reference: TechNet, Contents: Microsoft Knowledgebase, February 2000 issue PSS ID Number: Q179628

NEW QUESTION: 2When attempting to tunnel FTP traffic through a stateful firewall that might be performing NAT or PAT, which type of VPN tunneling should you use to allow the VPN traffic through the stateful firewall?**A.** clientless SSL VPN**B.** SSL VPN plug-ins**C.** smart tunnel**D.** IPsec over TCP**Answer: D****Explanation:**ExplanationIP Security (IPSec) over Transmission Control Protocol (TCP) enables a VPN Client to operate in an environment in which standard Encapsulating Security Protocol (ESP, Protocol 50) or Internet Key Exchange (IKE, User Datagram Protocol (UDP) 500) cannot function, or can function only with modification to existing firewall rules. IPSec over TCP encapsulates both the IKE and IPSec protocols within a TCP packet, and it enables secure tunneling through both Network Address Translation (NAT) and Port Address Translation (PAT) devices and firewalls

NEW QUESTION: 3A company has an Office 365 tenant. You plan to distribute the Office 365 ProPlus client to users. The client machines do not normally have Internet access. You need to activate the Office 365 ProPlus installations and ensure that the licenses remain active. What should you do?**A.** Connect the client computer to the Internet once to activate the Office 365

ProPlus client, and once every 180 days after that.**B.** Connect the client computer to the Internet once to activate the Office 365 ProPlus client, and once every 30 days after that.**C.** Connect the client computer to the Internet only once to activate the Office 365 ProPlus client.**D.** Connect the client computer to the Internet once to activate the Office 365 ProPlus client, and once every 90days after that.**E.** Connect the client computer to the Internet once to activate the Office 365 ProPlus client, and once every 365 days after that.**Answer: B**
Explanation:ExplanationAfter you've verified the user is assigned a license, you should check that Office 365 ProPlus is activated.Activation usually occurs during initial installation. The computer has to connect to the Internet at least once every 30 days for Office 365 ProPlus to remain activated.References:<https://technet.microsoft.com/en-us/library/gg702620.aspx>
