About some tough questions which are hard [ACP-01101 New APP Simulations](#) to understand or important knowledges that are easily being tested in exam.

NEW QUESTION: 1A. Option DB. Option AC. Option CD. Option B
Answer: B
Explanation: Rapid Elasticity Capabilities can be elastically provisioned and released, in some cases automatically, to scale rapidly outward and inward commensurate with demand. To the consumer, the capabilities available for provisioning often appear to be unlimited and can be appropriated in any quantity at any time. Consumers can leverage rapid elasticity of the cloud when they have a fluctuation in their IT resource requirements. For example, an organization might require doubling the number of web and application servers for a specific duration to accomplish a specific task. For the remaining period, they might want to release idle server resources to cut down the expenses. The cloud enables consumers to grow and shrink the demand for resources dynamically. EMC E10-001 Student Resource Guide. Module 13: Cloud Computing

NEW QUESTION: 2What are two functions of the Simple Cloud Service Provider Services as described in the Cloud Service Provider Adoption Pattern of the IBM Cloud Computing Reference Architecture V4?
