NEW QUESTION: 1You need to meet the LabelMaker application security requirement. What should you do?
A. Place the Azure Active Directory account into an Azure AD group. Create a ClusterRoleBinding and assign it to the group.
B. Create a RoleBinding and assign it to the Azure AD account.
C. Create a conditional access policy and assign it to the Azure Kubernetes Service cluster.
D. Create a Microsoft Azure Active Directory service principal and assign it to the Azure Kubernetes Service (AKS) cluster.
Answer: A
Explanation: Explanation/Reference: Explanation: Scenario: The LabelMaker applications must be secured by using an AAD account that has full access to all namespaces of the Azure Kubernetes Service (AKS) cluster. Permissions can be granted within a namespace with a RoleBinding, or cluster-wide with a ClusterRoleBinding. References: <https://kubernetes.io/docs/reference/access-authn-authz/rbac/> Testlet 2 Case Study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question. Requirements Receipt processing Concurrent processing of a receipt must be prevented. Logging Azure Application Insights is used for telemetry and logging in both the processor and the web application. The processor also has TraceWriter logging enabled. Application Insights must always contain all log messages. Disaster recovery Regional outage must not impact application availability. All DR operations must not be dependent on application running and must ensure that data in the DR region is up to date. Security Users' SecurityPin must be stored in such a way that access to the database does not allow the viewing of SecurityPins. The web application is the only system

that should have access to SecurityPins.All certificates and secrets used to secure data must be stored in Azure Key Vault.You must adhere to the principle of least privilege and provide privileges which are essential to perform the intended function.All access to Azure Storage and Azure SQL database must use the application's Managed Service Identity (MSI)Receipt data must always be encrypted at rest.All data must be protected in transitUser's expense account number must be visible only to logged in users. All other views of the expense account number should include only the last segment, with the remaining parts obscured.In the case of a security breach access to all summary reports must be revoked without impacting other parts of the system.IssuesUpload format issueEmployees occasionally report an issue with uploading a receipt using the web application. They report that when they upload a receipt using the Azure File Share, the receipt does not appear in their profile.When this occurs, they delete the file in the file share and use the web application, which returns a 500 Internal Server error page. Capacity issueDuring busy periods, employees report long delays between the time they upload the receipt and when it appears in the web application.Log capacity issueDevelopers report that the number of log message in the trace output for the processor is too high, resulting in lost log messages.Application codeProcessing.csDatabase.csReceiptUploader.cs ConfigureSSE.ps1
