NEW QUESTION: 1 IBM Sterling File Gateway is used for which MFT use case?**A.** Community-centric**B.** Person-centric use**C.** Extreme**D.** System-centric**Answer: B**

NEW QUESTION: 2 You have an Azure subscription named Subscription1. Subscription1 contains a virtual machine named VM1. You install and configure a web server and a DNS server on VM1. VM1 has the effective network security rules shown in the following exhibit. Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Box 1: Rule2 blocks ports 50-60, which includes port 53, the DNS port. Internet users can reach to the Web server, since it uses port 80. Box 2: If Rule2 is removed internet users can reach the DNS server as well. Note: Rules are processed in priority order, with lower numbers processed before higher numbers, because lower numbers have higher priority. Processing stops once traffic matches a rule, as a result, any rules that exist with lower priorities (higher numbers) that have the same attributes as rules with higher priorities are not processed. References: <https://docs.microsoft.com/en-us/azure/virtual-network/security-overview>

NEW QUESTION: 3 A. Option B B. Option C C. Option D D. Option A **Answer: A**
