NEW QUESTION: 1You develop an HTML5 webpage. You have the following HTML markup:
<input type="text" id="username" />You need to prevent users from entering specific characters into the username field.What should you do?**A.** Using the change event, add an anonymous function that returns true when a specific character keycode value is determined.**B.** Using the keydown event, add an anonymous function that returns false when a specific character keycode value is determined.**C.** Using the keyup event, add an anonymous function that returns true when a specific character keycode value is determined.**D.** Using the change event, add an anonymous function that returns false when a specific character keycode value is determined.**Answer: A**Explanation:ExplanationThe change event is fired for <input>, <select>, and <textarea> elements when a change to the element's value is committed by the user.Use the change event and an anonymous function to detect illegal specific characters in the input.

NEW QUESTION: 2Drag and drop the MPLS VPN concepts from the left onto the correct descriptions on the right.**Answer:** Explanation:Reference:
<https://www.rogerperkin.co.uk/featured/route-distinguisher-vs-route-target/>

NEW QUESTION: 3You have an availability set named AS1 that contains three virtual machines named VM1, VM2, and VM3.You attempt to reconfigure VM1 to use a larger size. The operation fails and you receive an allocation failure message.You need to ensure that the resize operation

succeeds. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** Explanation: Explanation: Action 1: Stop VM1, VM2 and VM3 If the VM you wish to resize is part of an availability set, then you must stop all VMs in the availability set before changing the size of any VM in the availability set. The reason all VMs in the availability set must be stopped before performing the resize operation to a size that requires different hardware is that all running VMs in the availability set must be using the same physical hardware cluster. Therefore, if a change of physical hardware cluster is required to change the VM size then all VMs must be first stopped and then restarted one-by-one to a different physical hardware clusters. Action 2: Resize VM1 Action 3: Start VM1, VM2, and VM3 References: <https://azure.microsoft.com/es-es/blog/resize-virtual-machines/>
