Do you have no confidence to take the exam?

NEW QUESTION: 1You have a computer that runs Windows 7.You run Runas and specify the /savecred parameter to start an application.You need to delete the stored password.What should you do?**A.** Run Runas and specify the /nopprofile parameter.**B.** Run Del and specify the /p parameter.**C.** From Authorization Manager, modify the Authorization Manager options.**D.** From Credential Manager, modify the Windows credentials.**Answer: D**Explanation:Credential Manager Credential Manager stores logon user name and passwords for network resources, including file servers, Web sites, and terminal services servers. Credential Manager stores user name and password data in the Windows Vault. You can back up the Windows Vault and restore it on other computers running Windows 7 as a method of transferring saved credentials from one computer to another. Although Credential Manager can be used to back up some forms of digital certificates, it cannot be used to back up and restore the self-signed Encrypting File System (EFS) certificates that Windows 7 generates automatically when you encrypt a file. For this reason, you must back up EFS certificates using other tools. You will learn about backing up EFS certificates later in this lesson.

NEW QUESTION: 2Which attribute is defined as the percentage of orders that are filled

perfectly?**A.** reliability**B.** responsiveness**C.** asset management**D.** flexibility**E.** costs**Answer: A**
