**NEW QUESTION: 2** Which of the following statements is most correct?  
**A.** The capital structure which minimizes the firm's cost of capital is also the capital structure which maximizes the firm's earnings per share.  
**B.** None of these statements are correct.  
**C.** If a firm finds that the cost of debt financing is currently less than the cost of equity financing, an increase in its debt ratio will always reduce its cost of capital.  
**D.** A firm can use retained earnings without paying a flotation cost. Therefore, while the cost of retained earnings is not zero, the cost of retained earnings is generally lower than the after-tax cost of debt financing.  
**E.** The capital structure which minimizes the firm's cost of capital is also the capital structure which maximizes the firm's stock price.  
**Answer: E**  
Explanation: Explanation/Reference: Explanation: The optimal capital structure is the one that maximizes the price of the firm's stock, and this generally calls for a debt ratio which is lower than the one that maximized expected EPS.
