NEW QUESTION: 1 A client/server implementation approach in which any platform may act as a client or server or both is called:
A. Graphical User Interface (GUI)
B. Peer-to-peer
C. Application Programming Interface (API)
D. Simple file transfer
Answer: B
Explanation: In answer Simple file transfer, a workstation or PC uses terminal emulation software and a client application program to receive data from a host machine. For answer API, an API defines how the client and server appear to each other and supports the exchange of information without either entity knowing the details of a particular resource that is accessed using the API. One example is the Generalized Security Application Programming Interface (GSAPI) that applications can use to access security services. Answer GUI, the GUI approach, is similar to the API implementation and employs a user interface such as SQL to access a server database.

NEW QUESTION: 2 Which statistics counter shows that a server connecting to a server Node group is asserting flow control?
A. Jabber frames 5000
B. MAC control frames 237 0
C. Code violations 10
D. MAC pause frames 302 0
Answer: D
