**NEW QUESTION: 1** 展示を参照してください。DFビットがPC Aに設定されているため、PC AはPC Bにデータを送信できません。問題を修正するアクションはどれですか？**A.** PC AのMSSを下げる**B.** R1とR3の間のGREトンネルを構成します**C.** ネットワークでQoSを構成します**D.** ネットワークでPMTUDを構成します**Answer: D**

**NEW QUESTION: 2** Match each service management phase with its process.**Answer:**  
Explanation: Explanation  
Service transition = Service Validation and testing  
Service design = Supplier Management  
Service operation = Request Fulfillment  
Service Strategy = Service Portfolio Management

**NEW QUESTION: 3** When is "Deny all" policy an exception in Zone Based Firewall?**A.** traffic traverses 2 interfaces in different zones**B.** traffic terminates on router via self zone**C.** traffic sources from router via self zone**D.** traffic terminates on router via self zone **E.** traffic traverses 2 interfaces in same zone**Answer: E**  
Explanation: Explanation+ There is a default zone, called the self zone, which is a logical zone. For any packets directed to the router directly (the destination IP represents the packet is for the router), the router automatically considers that traffic to be entering the self zone. In addition, any traffic initiated by the router is considered as leaving the self zone. By default, any traffic to or from the self zone is allowed, but you can change this policy.+ For the rest of the administrator-created zones, no traffic is allowed between interfaces in different zones.+ For interfaces that are members of the same zone, all traffic is permitted by default.
