A. When setting the rates for an FX swap to extend the maturity, the spot rate should be fixed immediately within the current spread
B. Where the use of non-current rates may be necessary, they should only be entered into with the prior explicit permission of the quoting party's senior management
C. Dealing and rollovers at non-current rates are forbidden as they can help perpetrate fraud and tax evasion
D. Dealing and rollovers at non-current rates are relatively common market practice and therefore should not be treated differently from any other transaction
Answer: A

NEW QUESTION: 2 An engineer is implementing management access to a Cisco Nexus platform. The customer requires a solution that provides isolation between the data and control planes. In addition to management that uses encryption and authentication. The customer will manage the device using both IPv4 and IPv6. Which two components should be used to meet these requirements (Choose two.)
A. mgmt0 interface
B. SVI interface
C. Telnet protocol
D. SSM protocol
E. SNMP
Answer: A, E
Explanation: We are talking about management only, so SSM is out. Since we need to separate between data and control plane, we should use mgmt0 interface, so SVI interface is out. Since we need to use encryption and authentication, this can be done in SNMPv3, while telnet does not support encryption, so telnet is out.
