NEW QUESTION: 1What server components are required for the IBM Domino 9.0 Social Edition OpenSocial component for IBM iNotes?**A.** one Domino mail server and one Domino server running Traveler with Shindig**B.** one Domino mail server and one Domino server running Shindig**C.** one Domino mail server and one IBM Sametime Community server**D.** one IBM Domino mail server with IBM Traveler on the same server**Answer: B**

NEW QUESTION: 2If the System Administrator set a user to create only a certain record type, this user's ability to view other record types is affected.**A.** True**B.** False**Answer: B**

NEW QUESTION: 3The security administrator notices a user logging into a corporate Unix server remotely as root. Which of the following actions should the administrator take?**A.** Ensure the root account has a strong password**B.** Delete the root account**C.** Create a firewall rule to block SSH**D.** Disable remote root logins**Answer: D****Explanation:**Remote users log in to Unix or Linux servers by using SSH. Although SSH is secure,allowing remote access as root is a security risk.One of the biggest security holes you could open on a Unix or Linux server is to allow directly logging in as root through SSH, because any cracker can attempt to brute forceyour root password and potentially get access to your system if they can figure out yourpassword. It's much better to have a separate account that you regularly use and simply sudo to rootwhen necessary.You should disable root ssh access by editing /etc/ssh/sshd_config to contain:
PermitRootLogin no

NEW QUESTION: 4You need to recommend a solution for the Audits and Notes folders.What should you include in the recommendation? To answer, select the appropriate options in the answer area.**NOTE:** Each correct selection is worth one point.**Answer:** **Explanation:**
