The passing rate of our C1000-170 training quiz is 99% and the hit rate is also high.

NEW QUESTION: 1 Refer to the exhibit. If the traffic flowing from network 192.168.254.0 to 172.16.250.0 is unencrypted, which two actions must you take to enable encryption? (Choose two). **A.** Configure the ISAKMP policy names to match on R1 and R2. **B.** Configure the crypto map names to match on R1 and R2. **C.** Configure the crypto map on R2 to include the correct subnet. **D.** Configure the Diffie-Hellman keys used in the ISAKMP policies to be different on R1 and R2. **E.** Configure the transform-set on R2 to match the configuration on R1. **Answer: C, E** **Explanation:** A transform set combines an encryption method and an authentication method. During the IPsec security association negotiation with ISAKMP, the peers agree to use a particular transform set to protect a particular data flow. The transform set must be the same for both peers. Also, the crypto map on R2 points to the address name of VPN, which includes 172.16.0.0/16, but it should be the local subnet of 192.168.0.0/16

NEW QUESTION: 2 For this question, refer to the TerramEarth case study. To be compliant with European GDPR regulation, TerramEarth is required to delete data generated from its European customers after a period of 36 months when it contains personal data. In the new architecture, this data will be stored in both Cloud Storage and BigQuery. What should you do? **A.** Create a BigQuery time-partitioned table for the European data, and set the partition period to 36 months. For Cloud Storage, use gsutil to create a SetStorageClass to NONE action with an Age condition of 36 months. **B.** Create a BigQuery table for the European data, and set the table retention period to 36 months. For Cloud Storage, use gsutil to enable lifecycle management using a DELETE action with an Age condition of 36 months. **C.** Create a BigQuery time-partitioned table for the European data, and set the partition expiration period to 36 months. For Cloud Storage, use gsutil to enable lifecycle management using a DELETE action with an Age condition of 36 months. **D.** Create a BigQuery table for the European data, and set the table retention period to 36 months. For Cloud Storage, use gsutil to create a SetStorageClass to NONE action when with an Age condition of 36 months. **Answer: D**

NEW QUESTION: 3 You are creating an application for computers that run Windows XP or later. This application must run after the computer starts. The user must not be aware that the application is running. The application performs tasks that require permissions that the logged-in user does not have. Which type of application allows this behavior? **A.** Windows Forms application **B.** Windows Store app **C.** Terminate-and-stay-resident (TSR) program **D.** Windows Service application **E.** DOS batch file **Answer: D**
