The customer has disabled your access to the show running-config command.Which of the following statements is true about the serial links that terminate in R3?**A.** The R2-R3 link OSPF timer values are 30, 120, 120**B.** R3 is responsible for flooding LSUs to all the routers on the network.**C.** The R1-R3 link OSPF timer values should be 10,40,40**D.** The R1-R3 link needs the neighbor command for the adjacency to stay up**Answer: A**

NEW QUESTION: 2Many approaches to Knowledge Discovery in Databases (KDD) are used to identify valid and useful patterns in data. This is an evolving field of study that includes a variety of automated analysis solutions such as Data Mining. Which of the following is not an approach used by KDD?**A.** Classification**B.** Deviation**C.** Probabilistic**D.** Oriented**Answer: D**
Explanation:Explanation/Reference:Explanation:Oriented is not a KDD approach.The following are three approaches used in KDD systems to uncover these patterns:Classification - Data are grouped together according to shared similarities.Probabilistic - Data interdependencies are identified and probabilities are applied to their relationships.Statistical - Identifies relationships between data elements and uses rule discovery.Another fourth data mining technique is deviation detection: find the record(s) that is (are) the most different from the other records, i.e., find all outliers. These may be thrown away as noise or may be the "interesting" ones.Incorrect Answers:A: Probabilistic is a KDD approach where data interdependencies are identified and probabilities are applied to their relationships.C: deviation detection is a KDD approach where the records that are the most different from the other records, i.e., find all outliers, are found.D: Classification is a KDD approach which identifies relationships between data elements and uses rule discovery.References:Conrad, Eric, Seth Misener and Joshua Feldman, CISSP Study Guide, 2nd Edition, Syngress, Waltham, 2012, p. 1368https://en.wikipedia.org/wiki/Data_mining
