appearing on or offered through these third-party sites, is not responsible for examining or evaluating these third-party sites Certificate H19-308_V4.0 Exam and does not assume any responsibility or liability for any actions, products, or content related to these third-party sites.

What's more, online version allows you to practice the H19-308_V4.0 test dump anywhere and anytime as long as you open it by internet, Now, I will recommend our H19-308_V4.0 HCSA-Presales-Storage V4.0 sure pass dumps for your preparation.

How can we do this, Especially for HCSA-Presales-Storage V4.0, H19-308_V4.0 exam dumps have three versions of downloading and studying, It's up to your choice now, Our Exam material has been designed and verified by the [Study 1D0-724 Material](#) team of experts, after an in-depth analysis of Huawei recommended material for HCSA-Presales-Storage V4.0 exam.

Most candidates want to pass H19-308_V4.0 Certification exam but couldn't find the best way to prepare it, Before clients purchase our H19-308_V4.0 test torrent they can download and try out our product freely to see if it is worthy to buy our H19-308_V4.0 exam questions.

Estruturit which has long focused on students how to H19-308_V4.0 New Exam Materials pass their It Certification exam, we offers the latest real It exam questions and answers for download.

NEW QUESTION: 1A company plans to move regulated and security-sensitive businesses to AWS. The Security team is developing a framework to validate the adoption of AWS best practice and industry-recognized compliance standards. The AWS Management Console is the preferred method for teams to provision resources. Which strategies should a Solutions Architect use to meet the business requirements and continuously assess, audit, and monitor the configurations of AWS resources? (Choose two.)**A.** Use Amazon CloudWatch Logs agent to collect all the AWS SDK logs. Search the log data using a pre-defined set of filter patterns that machines mutating API calls. Send notifications using Amazon CloudWatch alarms when unintended changes are performed. Archive log data by using a batch export to Amazon S3 and then Amazon Glacier for a long-term retention and auditability.**B.** Use AWS CloudTrail events to assess management activities of all AWS accounts. Ensure that CloudTrail is enabled in all accounts and available AWS services. Enable trails, encrypt CloudTrail event log files with an AWS KMS key, and monitor recorded activities with CloudWatch Logs.**C.** Use AWS Config rules to periodically audit changes to AWS resources and monitor the compliance of the configuration. Develop AWS Config custom rules using AWS Lambda to establish a test-driven development approach, and further automate the evaluation of configuration changes against the required controls.**D.** Use the Amazon CloudWatch Events near-real-time capabilities to monitor system events patterns, and trigger AWS Lambda functions to automatically revert non-authorized changes in AWS resources. Also, target Amazon SNS topics to enable notifications and improve the response time of incident responses.**E.** Use CloudTrail integration with Amazon SNS to automatically notify unauthorized API activities. Ensure that CloudTrail is enabled in all accounts and available AWS services. Evaluate the usage of Lambda functions to automatically revert non-authorized changes in AWS resources.**Answer: B,C**

Explanation:

<https://docs.aws.amazon.com/awscloudtrail/latest/userguide/cloudwatch-alarms-for-cloudtrail.html>

https://docs.aws.amazon.com/en_pv/awscloudtrail/latest/userguide/best-practices-security.html The AWS Config console shows the compliance status of your rules and resources. You can see how your AWS resources comply overall with your desired configurations, and learn which specific resources are noncompliant. You can also use the AWS CLI, the AWS Config API, and AWS SDKs to make requests to the AWS Config service for compliance information.
